Vision

“To become a beloved community hub where people connect, relax, and enjoy exceptional coffee experiences every day.”

Mission

“We are committed to serving high-quality, ethically sourced coffee in a welcoming environment, while delivering outstanding customer service and fostering meaningful connections within our community.”

Bright Coffee Shop Sales Analysis – Overview

- The Bright Coffee Shop Sales Analysis project is designed to support a newly appointed CEO in making data-driven decisions to grow revenue and improve product performance.

- Using historical transactional data from the coffee shop compiled from 1 January to 30 June 2023, the project focuses on extracting meaningful insights that can guide business strategy.

- As a Junior Data Analyst, my primary responsibility is to analyze daily sales data and transform it into actionable insights. This involves working with data processing tools using Databricks, performing calculations using Excel, and presenting findings using Canva in a clear and visually engaging way.

- The analysis aims to answer key business questions, including identifying the top-performing products, understanding peak sales periods, and evaluating sales trends across different time intervals and product categories.

- These insights will help the business optimize operations, improve customer experience, and increase profitability.

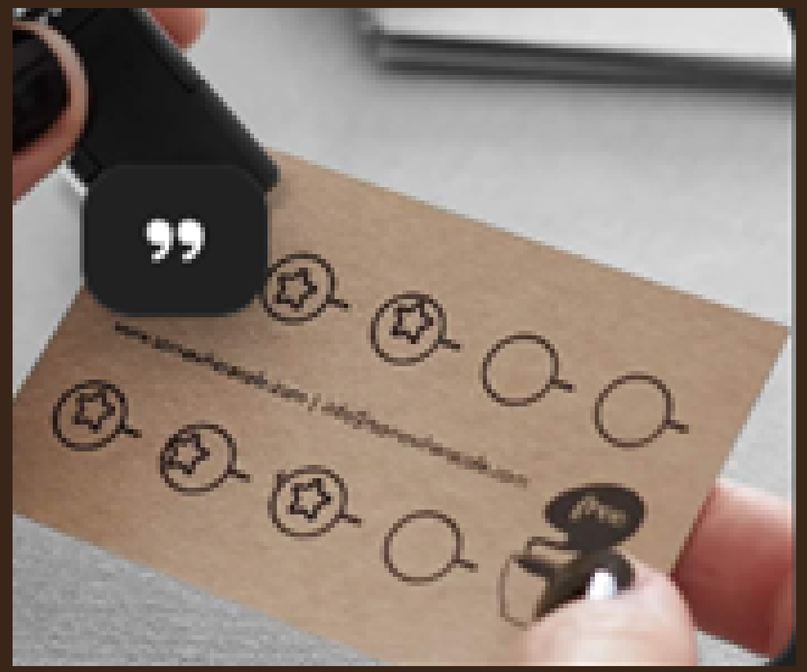
Recommendations

1. Promoting high-performing products
   - Highlight best-sellers
   - Bundle offers & promotions
   - Social media marketing
   - Upselling & cross-selling
   - Time-based promotions
   - Loyalty programs
   - Seasonal variations

Stock more of high-performing products



2. Improving sales during slow periods

- Happy Hour & Time-Based Discounts
- Offer discounts during off-peak hours (e.g., 2–5 PM)
- Promote “Afternoon Specials” or “Slow Hour Deals”
- Give double loyalty points during slow times
- Bundle Deals & Combos (Buy coffee, get a muffin/croissant at 50%)
- Attract Remote Workers & Students (Offer free Wi-Fi) + charging stations

3. Marketing campaigns during slow time slots

- Display in-store and promote online
- Post limited-time offers on Instagram/WhatsApp
- Offer exclusive off-peak bundles e.g., “Coffee + Muffin for R30 (2–5 PM only)”
- Offer double points or extra stamps during slow times e.g., “Earn 2x rewards between 2–4 PM.”
-

4. Promoting underperforming products

- Offer short-term discounts to boost trial
- Use urgency: “20% off today only”
- Pair underperforming items with popular products, e.g., “Buy a cappuccino, get a muffin at 50% off.”
- Move items to eye-level displays
- Highlight on the menu as “Try Something New.”
- Use attractive visuals and descriptions
- Train staff to recommend underperforming items
- Use scripts like: “Have you tried our new blueberry muffin?”
- Personal recommendations increase conversion
- Social Media Promotion

4.1 Long-term initiatives

To maintain the success of the business, it is advised that the business:

- Collects and centralises data
- Builds a data pipeline
- Creates Dashboards using tools like Microsoft Power BI or Microsoft Excel
- Use it to track total revenue, sales by product, peak hours, and best/lowest performing products
- Schedule daily/ weekly refresh and send reports via email and dashboard sharing
- Tracking could be used for, amongst others, revenue per day/week, top performing products, and slow time slots, or average order value

4.2 Business Impact

This will positively impact the business in:

- Faster decision-making
- Identify trends early
- Reduce manual work
